Wireless WriteScreen® Pad

Model: RMK-T05

The Wireless WriteScreen® Pad utilizes Bluetooth® and electromagnetic tablet technology. It connects to your PC via a USB Bluetooth® dongle as a wireless device; or via a USB cable as a wired device. It provides an additional electronic pen input device. This electronic pen works in conjunction with the tablet and can direct the mouse cursor displayed on the screen to move, to left-button click, to right-button click and to double-left-button click by a single switch press. It offers the accuracy and precision that you need to create, envision, and perfect your artwork. Touch up digital photos with the ease and comfort of the pen with software like Adobe Photoshop®. Use the pen's pressure sensitive tip to create brush-effects on digitized works of art in your favorite painting program. There are many applications, such as PowerPoint®, NetMeeting®, MSN Messenger®, Paint®, etc. that have “pen” features. You will find that the Hi-Tech Bluetooth pen tablet will be easy and enjoyable for use in those applications. For those applications that do not have a pen featured, the included *Hi-Tech Annotation* and presentation software can make it as if they had built-in pen features.

Specification:

Weight:	400g	Max Sense Height:	8mm
Active area:	6” x 4.5”	Pressure levels:	512
Interface:	USB 1.1	Report Rate:	125 reports/sec
Power (USB):	< 40 mA (wired tablet)	Accuracy:	+/- 0.42mm
Power (Battery):	Operation < 180mA (3V wireless)	Line distortion	+/- 2mm max.
	Standby < 100mA (3V wireless)		
	Suspend < 20mA (3V wireless)		
Power (dongle)	Search < 90mA (USB port)		
	Connect < 40mA (USB port)		
	Standby < 10mA (USB port)		
Technology:	Electromagnetic		
Pen:	AAA (1.5V) battery powered 3 buttons (left, right & left- double)
